9. Flatness - Angstroms _____ Microns _____ 10. Parallelism _____
11. Surface Roughness _____ 12. Scratch Dig _____

NOTE: Describe cosmetic points to be considered, or special items not listed

In general, this form's sole purpose is for a customer to specify a material and the substrate conditions for Nanofilm to supply by an outside optical house using the above. The form is not a commitment from Nanofilm that the described substrate can be supplied to the specification from said optical house. In some instances the above specification may not be confirmed within Nanofilms processes.
